Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

Listing of the Claims:

1. (Withdrawn) A method of diagnosing or prognosticating a neurodegenerative

disease in a subject, or determining whether a subject is at increased risk of developing said

disease, comprising:

determining a level and/or an activity of

(i) a transcription product of the TB2 gene, and/or

(ii) a translation product of the TB2 gene, and/or

(iii) a fragment, or derivative, or variant of said transcription or translation product in

a sample from said subject and comparing said level and/or said activity to a reference value

representing a known disease or health status, thereby diagnosing or prognosticating said

neurodegenerative disease in said subject, or determining whether said subject is at increased risk

of developing said neurodegenerative disease.

2. (Withdrawn) The method according to claim 1 wherein said neurodegenerative

disease is Alzheimer's disease.

3. (Withdrawn) A kit for diagnosing or prognosticating a neurodegenerative

disease in a subject, or determining the propensity or predisposition of a subject to develop such

a disease, said kit comprising:

-3-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

(a) at least one reagent which is selected from the group consisting of (i) reagents that

selectively detect a transcription product of the TB2 gene and (ii) reagents that selectively detect

a translation product of the TB2 gene; and

(b) an instruction for diagnosing or prognosticating a neurodegenerative disease, or

determining the propensity or predisposition of subject to develop such a disease by (i) detecting

a level, or an activity, or both said level and said activity, of said transcription product and/or

said translation product of the TB2 gene, in a sample from said subject; and (ii) diagnosing or

prognosticating a neurodegenerative disease, or determining the propensity or predisposition of

said subject to develop such a disease, wherein a varied level, or activity, or both said level and

said activity, of said transcription product and/or said translation product compared to a reference

value representing a known health status; or a level, or activity, or both said level and said

activity, of said transcription product and/or said translation product similar or equal to a

reference value representing a known disease status indicates a diagnosis or prognosis of a

neurodegenerative disease, or an increased propensity or predisposition of developing such a

disease.

4. (Withdrawn) A modulator of an activity and/or of a level of at least one

substance which is selected from the group consisting of:

(i) the TB2 gene,

(ii) a transcription product of the TB2 gene, and

-4-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

(iii) a translation product of the TB2 gene, and

(iv) a fragment, or derivative, or variant of (i) to (iii).

5. (Withdrawn) A recombinant, non-human animal comprising a non-native gene

sequence coding for TB2 or a fragment, or a derivative, or a variant thereof, said animal being

obtainable by:

(i) providing a gene targeting construct comprising said gene sequence and a

selectable marker sequence, and

(ii) introducing said targeting construct into a stem cell of a non-human animal, and

(iii) introducing said non-human animal stem cell into a non-human embryo, and

(iv) transplanting said embryo into a pseudopregnant non-human animal, and

(v) allowing said embryo to develop to term, and

(vi) identifying a genetically altered non-human animal whose genome comprises a

modification of said gene sequence in both alleles, and

(vii) breeding the genetically altered non-human animal of step (vi) to obtain a

genetically altered non-human animal whose genome comprises a modification of said

endogenous gene, wherein said disruption results in said non-human animal exhibiting a

predisposition to developing symptoms of a neurodegenerative disease or related diseases or

disorders.

-5-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

6. (Withdrawn) A method for screening for a modulator of neurodegenerative

diseases, or related diseases or disorders of one or more substances selected from the group

consisting of:

(i) the TB2 gene,

(ii) a transcription product of the TB2 gene,

(iii) a translation product of the TB2 gene, and

(iv) a fragment, or derivative, or variant of (i) to (iii),

said method comprising:

(a) contacting a cell with a test compound;

(b) measuring the activity and/or level of one or more substances recited in (i) to (iv);

(c) measuring the activity and/or level of one or more substances recited in (i) to (iv)

in a control cell not contacted with said test compound; and

(d) comparing the levels and/or activities of the substance in the cells of step (b) and

(c), wherein an alteration in the activity and/or level of substances in the contacted

cells indicates that the test compound is a modulator of said diseases or disorders.

7. (Withdrawn) A method of screening for a modulator of neurodegenerative

diseases, or related diseases or disorders of one or more substances selected from the group

consisting of

(i) the TB2 gene,

-6-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

(ii) a transcription product of the TB2 gene,

(iii) a translation product of the TB2 gene, and

(v) a fragment, or derivative, or variant of (i) to (iii),

said method comprising:

(a) administering a test compound to a test animal which is predisposed to developing

or has already developed symptoms of a neurodegenerative disease or related diseases or

disorders in respect of the substances recited in (i) to (iv);

(b) measuring the activity and/or level of one or more substances recited in (i) to (iv);

(c) measuring the activity and/or level of one or more substances recited in (i) to (iv)

in a matched control animal which is predisposed to developing or has already developed

symptoms of a neurodegenerative disease or related diseases or disorders in respect to the

substances recited in (i) to (iv) and to which animal no such test compound has been

administered;

(d) comparing the activity and/or level of the substance in the animals of step (b) and

(c), wherein an alteration in the activity and/or level of substances in the test animal indicates

that the test compound is a modulator of said diseases or disorders.

8. (Withdrawn) The method according to claim 7 wherein said test animal and/or

said control animal is a recombinant animal which expresses a gene coding for TB2, or a

-7-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

fragment, or a derivative, or a variant thereof, under the control of a transcriptional control

element which is not the native TB2 gene transcriptional control element.

9. (Currently Amended) An assay for testing a compound for inhibition of binding

between a ligand and a translation product of the gene coding for TB2 the amino acid sequence

of SEQ ID No. 1, or a fragment, or derivative, or variant thereof, said assay comprising the steps

of:

(i) adding a liquid suspension of said TB2-translation product of the gene coding for

the amino acid sequence of SEQ ID No. 1 to a plurality of containers;

(ii) adding a compound or a plurality of compounds to be screened for said inhibition

to said plurality of containers;

(iii) adding a detectable, labeled ligand to said containers;

(iv) incubating said TB2 translation product of the gene coding for the amino acid

sequence of SEQ ID No. 1, or said fragment, or derivative, or variant thereof, and said

compound or compounds, and said labeled ligand;

(v) measuring amounts of detectable label associated with said TB2 translation

product of the gene coding for the amino acid sequence of SEQ ID No. 1, or with said fragment,

or derivative, or variant thereof; and

(vi) using the measured amounts of detectable label to determine determining the

degree of inhibition by one or more of said compounds of binding of said ligand to said TB2

-8-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

translation product of the gene coding for the amino acid sequence of SEQ ID No. 1, or said

fragment, or derivative, or variant thereof.

10. (Withdrawn) The method of claim 1, comprising determining a level and/or an

activity of a protein molecule shown in SEQ ID NO. 1, said protein molecule being a translation

product of the gene coding for TB2, or a fragment, or derivative, or variant thereof.

11. (Withdrawn) The method of claim 6, wherein said screening is for a modulator of

a protein molecule shown in SEQ ID NO. 1, said protein molecule being a translation product of

the gene coding for TB2, or a fragment, or derivative, or variant thereof, wherein said modulator

is a reagent or compound for preventing, or treating, or ameliorating a neurodegenerative

disease.

12. (Withdrawn) A method of detecting a pathological state of a cell in a sample from

a subject, said method comprising staining said cell by immunocytochemical staining with an

antibody specifically immunoreactive with an immunogen, wherein said immunogen is a

translation product of the gene coding for TB2, SEO ID NO. 1, or a fragment, or derivative, or

variant thereof, wherein an altered degree of staining, or an altered staining pattern in said cell

compared to a cell representing a known health status indicates a pathological state of said cell.

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

13. (Withdrawn) The kit of claim 3, wherein said neurodegenerative disease is

Alzheimer's disease.

14. (Withdrawn) A pharmaceutical composition comprising the modulator of claim

4.

15. (Withdrawn) The method of claim 6, wherein said neurodegenerative disease is

Alzheimer's disease.

16. (Withdrawn) The method of claim 7, wherein said neurodegenerative disease is

Alzheimer's disease.

17. (Currently Amended) The assay of claim 9, wherein said assay is for screening a

plurality of compounds for inhibition of binding between a ligand and a translation product of

the gene coding for TB2 the amino acid sequence of SEQ ID No. 1, or a fragment, or a

derivative, or a variant thereof.

18. (Previously Presented) The assay of claim 9, wherein the detectable, labeled

ligand is a fluorescently labeled ligand.

-10-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

19. (Currently Amended) The assay of claim 9, wherein the detectable label is

fluorescence-fluorescent.

20. (Withdrawn) The method of claim 10, wherein the neurodegenerative disease is

Alzheimer's disease.

21. (Withdrawn) The method of claim 11, wherein the neurodegenerative disease is

Alzheimer's disease.

22. (Withdrawn) The method of claim 7, wherein said screening is for a modulator of

a protein molecule shown in SEQ ID NO. 1, said protein molecule being a translation product of

the gene coding for TB2, or a fragment, or derivative, or variant thereof, wherein said modulator

is a reagent or compound for preventing, or treating, or ameliorating a neurodegenerative

disease.

23. (Withdrawn) The method of claim 22, wherein the neurodegenerative disease is

Alzheimer's disease.

24. (Currently Amended) The method assay of claim 9, wherein said assay is for

testing a compound for inhibition of binding between a ligand and a protein molecule shown in

-11-

Applicants: Heinz VON DER KAMMER et al.

Attorney Docket No. 37998-237382

SEQ ID NO. 1, said protein molecule being a translation product of the gene coding for TB2, or a

fragment, or derivative, or variant thereof, wherein said compound is for preventing, or treating,

or ameliorating a neurodegenerative disease.

25. (Currently Amended) The method assay of claim 24, wherein the

neurodegenerative disease is Alzheimer's disease.
